

# ICD-10 Provider Testing - Facility

Testing Guidance for  
Providers

## I. Sendero Health Plans Provider Testing Guidance for Facilities

Sendero Health Plans has implemented system and business process changes to accommodate ICD-10 codes and comply with the ICD-10 regulatory mandate. Sendero Health Plans has conducted extensive internal testing to ensure we can accept, process and pay ICD-10 claims and are now ready to begin end-to-end testing with providers.

Sendero Health Plans has established an end-to-end testing period for providers that are interested in participating in end-to-end testing and who meet our prerequisites. End-to-end testing is available through September 15<sup>th</sup>, 2015.

We are strongly encouraging provider practices to complete, at a minimum, EDI Transaction Testing with their Clearinghouse. By completing this level of testing, you will be able to validate your facility can submit, and Sendero Health Plans can receive, ICD-10 compliant claims. Please note, we have provided instructions below on how to submit ICD-10 test claims to our clearinghouse (Emdeon), whether you submit directly to Emdeon or through a separate clearinghouse.

## II. Scope & Approach

Providers are encouraged to select test claims based upon their top volume of ICD-9 codes/DRGs used today. There is no limit to the # of test files that can be submitted to Emdeon however we encourage a minimum of 100 test claims be submitted that represent different services. There are two types of testing available to providers:

- EDI Transaction Testing: This form of testing will validate you can submit, and Sendero Health Plans can receive, ICD-10 compliant claims.
- End-to-End Testing: Sendero Health Plans can pull test files from Emdeon in order to complete end-to-end claims testing if provider communicates to Sendero Health Plans the test file information as outlined in instructions below. Sendero Health Plans cannot guarantee we will be able to complete end-to-end for all test files but will prioritize based upon date submitted to Emdeon and will complete as many as possible during the testing window (now through September 15, 2015).

## III. Test Data Creation

### Key attributes of the test file:

- Each file must contain all required fields that are applicable to the encounter.
- Each claim must only contain valid ICD-10 diagnosis codes. Please refer to the CMS List of Valid ICD-10 codes:
  - [ICD-10-CM codes](#)
  - [ICD-10-PCS codes](#)
- Each claim must contain valid provider, member, and encounter data
- Minimum of 100 test claims is recommended (can be a mix of inpatient and hospital outpatient although recommend the focus is on inpatient)
- Please refer to the Emdeon Quick Start Guide referenced below for detailed instructions of file formatting and submission process

- Test claims submitted must have a discharge date or date of service on or after 01/01/14 in order to be accepted by Sendero Health Plans *testing* environment.

**What kind of claims to include in the file:**

- High volume diagnosis codes and/or DRG codes; if you have completed a DRG shift analysis for ICD-10 you may consider focusing on those DRG identified as having a potential shift opportunity
- Sendero Health Plans has completed extensive internal testing to ensure our systems and processes are ICD-10 compliant. For reference purposes, Appendix A represents the range of ICD-9 codes (mapped to ICD-10 codes) that were the focus of the internal integrated testing conducted to date.

## **IV. Test file submission**

**EDI Transaction Testing:**

**If submitting directly to Emdeon:**

Please refer to Emdeon's "Submitter Provider Quick Start Guide" for detailed instructions on how to submit ICD-10 test files.

<http://www.emdeon.com/5010/pdfs/ICD10SubmitterProviderQuickStartGuide.pdf>.

**If submitting to a clearinghouse that will then submit to Emdeon for the provider:**

Contact clearinghouse to submit the test file to Emdeon on their behalf following the same instructions.

Also please, refer to Emdeon's ICD-10 Testing website for more information.

[http://www.emdeon.com/icd10/icd10\\_testing.php](http://www.emdeon.com/icd10/icd10_testing.php)

**For paper claims:**

Paper Claims for ICD-10 Testing should be sent to:

Attention: Tabitha Mayfield, Valence Health  
540 W. Madison, Suite 1500  
Chicago, IL 60661

**End-to-End Testing:**

In order to participate in end-to-end testing with Sendero Health Plans, you must participate in EDI Transaction Testing (as outlined above) and provide Sendero Health Plans with the following information submitted to Emdeon so we can identify and pull your claims files from Emdeon.

- Provider Name and ID
- Test File Name
- Claims Count
- Claim type (professional or institutional)
- Vendor/Clearinghouse Provider worked with to submit claims to Emdeon:
  - Vendor's submitter ID:
  - Submission Date

Please send this information to: Laura Fierro - Director Network Operations,  
[laura.fierro@senderohealth.com](mailto:laura.fierro@senderohealth.com)

## **V. Communicating the test results**

### **EDI Transaction Testing:**

Submitters/providers can send ICD-10 coded test claims for any and all Emdeon payers and will receive standard clearinghouse claim status reporting feedback.

### **End-to-End Testing:**

Submitters/providers will receive standard 835 results and/or EOP files based upon current reporting preferences

Note: Major issues or errors in files received may warrant additional analysis and communication

## **VI. Timeline**

Sendero Health Plans is currently accepting test files from providers.

### **EDI Transaction Testing:**

Providers can participate in this level of testing through 09/30/15.

### **End-to-End Testing:**

In order to participate in end-to-end testing, test files must be accepted by Emdeon, and Health Plan must be notified of file, by 09/15/2015. Sendero Health Plans will prioritize test files based upon date Sendero Health Plans notified of file submission to Emdeon. We recommend submitting test files as soon as possible. Any test file submitted after 09/15/15 will receive the standard EDI acknowledgement response from Emdeon.

## **VII. Sendero Health Plans Testing Activities**

The Sendero Health Plans test environments will be configured as a replica of the target production environments on Oct 1, 2015. Claim files will follow the following process to accept, adjudicate and process the test file.

1. Files passed through claims scrubber
2. File loaded into core systems
3. Claims assigned internal tracking numbers
4. Initial claim edits
5. Secondary claim edits
6. Final claim edits
7. Auto-adjudication
8. Manual adjudication
9. Audit review
10. RFF process
11. Payment process
12. Audit review
13. EOP/EOB/835/EFT creation
