**Sendero is not requiring copays or cost sharing for COVID-19 testing.**  
**This includes free telemedicine.**

Please activate your telemedicine account by clicking [here](#).

Sendero is closely monitoring COVID-19, known as the Coronavirus. Our top priority is the safety of our customers, employees and partners. Below is some information about the virus, including helpful links and a few questions and answers to keep you up-to-date and informed.

Please note that the content below is not intended to be a substitute for professional medical advice, diagnosis or treatment. Always seek the advice of your physician or other qualified health provider with any questions you may have regarding a medical condition.

### **What is Coronavirus?**

Coronavirus refers to a family of viruses. Under microscopes, these viruses appear round like the sun, with a surrounding bright ring, just like the sun's outer layer which is called the "corona" -- hence the name. Some Coronaviruses are mild, for example, the virus that causes the common cold. Other Coronaviruses -- such as the one that has caused the recent outbreak in Wuhan, China -- can be very dangerous, and even deadly.

### **What are symptoms of Coronavirus?**

The primary symptoms include fever, dry cough and shortness of breath. Other symptoms may include sore throat, feeling tired and achy. These symptoms are similar to those of the flu, which is caused by influenza virus. People with underlying health issues are more likely to experience serious symptoms from the flu and from this Coronavirus.

### **How can I protect myself from Coronavirus?**

Frequent handwashing and avoiding close contact with people suffering from respiratory infections, are important to prevent this and other viruses from spreading. Scientists are working overtime to develop a vaccine for the virus, but we are told that any kind of breakthrough is still weeks, if not months, away. However, staying up to date on other vaccinations that are available, including the flu shot, will help support your overall health.

### **Is there a treatment for Coronavirus?**

Because this is a viral outbreak, antibiotics will not help. Treatment is supportive, such as helping patients breathe and stay hydrated. Although severe and fatal illness has been reported in some patients, many more have milder symptoms and have recovered fully without hospitalization.

### **Where can I get more information?**

For more information about the Coronavirus, please visit the following links:

- [Centers for Disease Control](#)

- [Johns Hopkins](#)

## External Communication Frequently Asked Questions and Answers

### **Does Sendero cover the cost of tests and test kits for COVID-19?**

Yes, Sendero provides coverage for testing, and is not requiring member copays or cost sharing for tests and test kits.

### **Are prior authorizations required for COVID-19 testing?**

No prior authorization is required for testing.

### **What are we telling members who think they may have symptoms?**

- We are encouraging our members to stay home if they feel ill.
- We recommend that they report their condition to their family doctor.
- We recommend that they contact our Nurse Advice Line for guidance at 855-880-7019 or Telemedicine Service, which are both available 24/7 and may provide a prompt response.
- We are also encouraging them to follow the [health guidelines from the Centers for Disease Control](#).

### **What are we telling members who think they need testing?**

- If a doctor or the Nurse Advice Line or Telemedicine Service recommend that you should be tested they should have provided directions on where you should go to be tested.
- Sendero does not require copays or cost sharing for COVID-19 testing.

### **What are we telling members who think they need treatment?**

- If a doctor identified you as a person who needs treatment, he or she will coordinate your care.
- COVID-19 treatment is covered by your Sendero benefit plan.

### **How can I minimize the spread of the virus?**

We recommend that you follow the guidelines from the Centers for Disease Control to prevent spread of the virus. You can read the full guidelines [here](#), which include the following:

- Wash your hands with soap and water for at least 20 seconds.
- Avoid close contact with people who are sick.
- Avoid touching your eyes, nose and mouth with unwashed hands.
- Stay home when you are sick.
- Cover your cough or sneeze with a tissue, then throw the tissue in the trash.
- Clean and disinfect frequently touched objects and surfaces using a regular household cleaning spray or wipes.
