Provider Notice: Updated Preauthorization Codes

DATE	November 2, 2026
TO	All Sendero Health Plans Network Providers
SUBJECT	Updated Preauthorization Codes

Dear Sendero Physicians and Providers:

Sendero Health Plans is providing notice of the codes below including newly developed 2026 codes issued by the American Medical Association (AMA) and the Centers for Medicare & Medicaid Services (CMS). At initial implementation, these codes will require preauthorization, effective January 1, 2027. Sendero will continue to review the applicable coverage and medical-necessity criteria and may remove preauthorization requirements when appropriate.

Providers will be notified at least five days before a preauthorization requirement is removed and at least 60 days before an additional preauthorization requirement is implemented.

Before providing a service, please confirm the current preauthorization requirement using Sendero's online healthcare service code lookup tool: Sendero Preauthorization Search

Codes included in this notice:

CPT codes

Important information

- The Preauthorization List and Guidance identifies healthcare services that require notification to Sendero and services that require preauthorization. It is available on the Sendero Provider Resources page.
- All covered services must be medically necessary, whether or not preauthorization is required. Services may be subject to retrospective review for medical necessity.
- The online lookup tool identifies the healthcare service codes that currently require preauthorization and provides the applicable criteria used to determine medical necessity or benefit coverage. Access the Sendero Preauthorization Search.

Thank you for your continued partnership in coordinating timely, medically necessary care for Sendero members.

Sincerely,

Sendero Health Plans
